

# Subtraction

Subtraction is the opposite of addition. For these first problems, think about what you would add to the lefthand number to make the ending sum!

$66 - \underline{\quad} = 57$

$98 - \underline{\quad} = 87$

$91 - \underline{\quad} = 87$

$42 - \underline{\quad} = 37$

$58 - \underline{\quad} = 49$

$35 - \underline{\quad} = 27$

$76 - \underline{\quad} = 68$

$14 - \underline{\quad} = 7$

$41 - \underline{\quad} = 35$

$78 - \underline{\quad} = 69$

$94 - \underline{\quad} = 88$

$33 - \underline{\quad} = 25$

Now, use that thinking to solve these subtraction equations!

$80 - 4 = \underline{\quad}$

$67 - 8 = \underline{\quad}$

$34 - 5 = \underline{\quad}$

$68 - 9 = \underline{\quad}$

$80 - 8 = \underline{\quad}$

$13 - 7 = \underline{\quad}$

$44 - 6 = \underline{\quad}$

$67 - 9 = \underline{\quad}$

$54 - 6 = \underline{\quad}$

$28 - 9 = \underline{\quad}$

$34 - 2 = \underline{\quad}$

$82 - 9 = \underline{\quad}$

$52 - 7 = \underline{\quad}$

$24 - 8 = \underline{\quad}$

$11 - 5 = \underline{\quad}$

$67 - 8 = \underline{\quad}$

$93 - 8 = \underline{\quad}$

$62 - 9 = \underline{\quad}$
